

## STARTING THE SMART BOARD

---

### STARTING THE SMART BOARD

Before the SMART Board can be used, it is necessary to turn the computer on. A desktop computer is installed with the SMART Board. Once the computer is on, the SMART Board will start automatically. The computer is located on the bottom shelf of the SMART Board cart, along with the DVD player. A desktop computer is attached to the SMART Boards that are not portable.

### STARTING THE SMART BOARD

- † Ensure that the SMART Board and projector are connected to the computer.
- † Turn on the computer.
- † Log on to the computer.
- † Turn on the projector.
- † The SMART Board draws power from the computer and will, therefore, activate automatically.
- † Check to make sure the Ready Light is on.
  - ✦ This will indicate that the SMART Board has power.
  - ✦ When the Ready Light turns green, the computer and the SMART Board have established communication.
- † The SMART Board should now be touch sensitive.
- † Open the application that is to be used for the presentation.
