

Call Manager - Options and Preferences Window Language

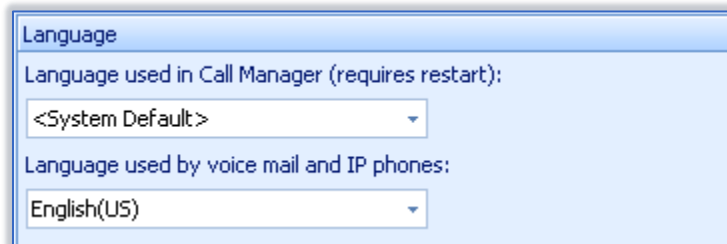

This window contains panels that are used to configure many Call Manager options, components, and functions. The options that are available depend upon the features for which the user is authorized.

DISPLAY OPTIONS AND PREFERENCES WINDOW

- ❖ Do one of the following:
 - Click **Tools** on the **Main Menu**.
 - Click the **Application Button**.
 - Right-click the **Call Manager** icon in the **System Tray**.
- ❖ Click **Options**.
- ❖ The **Options and Preferences** window will display.

LANGUAGE

This window is used to specify the language the system will use for Call Manager panels, Voice Mail prompts, and IP Phone instructions.

- ❖ Open the **Options and Preferences** window.
- ❖ Click the **Language** link on the left side of the window.
- ❖ Make changes to the available parameters. These parameters are described below.
 - **Language Used in Call Manager** - Use this option to specify the language through which Call Manager will display information.
 - **System Default** - This option refers to the language designated by the administrator as the default language. Call Manager must be closed and reopened in order for any changes to take effect.
 - **Language Used by Voice Mail Prompts and IP Phones** - This option is used to specify the language the system will use for the IP Phone display messages and voice mail and audio prompts.
